What is v-safe?

V-safe is a quick and easy way to share with CDC how you, or your dependent, feel after getting a COVID-19 or monkeypox vaccine. It takes just a few minutes to enroll, and then you will receive text messages to complete **short, confidential health check-ins**. Your participation in v-safe helps CDC monitor the safety of vaccines for everyone.

V-safe features:

- **Receive health check-ins via text** after vaccination
- **Enroll your dependents** and complete check-ins on their behalf
- **Share** how you feel **after any vaccine dose**

How can I enroll and how does it work?

You can enroll in v-safe after you get any dose of COVID-19 or monkeypox vaccine by going to vsafe.cdc.gov.

During the first week after vaccination, you will receive a daily text message that asks how you feel. After that, you will receive **occasional check-ins** that you can opt out of at any time. Depending on your answers, **someone from CDC may call** to get more information. **Your personal information in v-safe is protected so it's safe and private***.

How can I enroll my child or dependent?

To enroll a child or dependent (family member or friend) in v-safe, **add them to your existing account** or create a new account if you don't have one yet. Children under 16 years old need to be added to a parent or guardian's v-safe account. Enrolling a dependent does not require you to enter your own vaccination information or complete health check-ins for yourself.
